PREFACE.

THIS volume contains seven parts which have already been issued separately, and are now presented collectively, accompanied by a General Index covering the subjects treated.

Two sections, viz., Part iv., Population and Vital Statistics and Part vi., Trade, Transport and Communication, omitted from the Register for 1943–44 owing to shortage of staff for compilation and printing, are included in this issue. The latter part contains statistics of oversea trade and shipping which, for security reasons, could not be published during the war period.

Every care has been taken to keep the work free from errors, but if any have escaped detection it would be deemed a favour if their nature were indicated.

The figures should be read in conjunction with the "Official Year Book of New South Wales."

The Government Statistician wishes to express his thanks to the Commonwealth Statistician, to the responsible officers of the various State and Commonwealth Departments and to others, who have supplied all desired information, often at considerable trouble.

FACTORY STATISTICS.

SCOPE OF THE STATISTICS AND DEFINITIONS OF TERMS USED.

Scope.—The statistics are compiled annually in respect of—

Number and size of factories; number of persons employed in various categories; salaries and wages paid; rated horse-power of engines ordinarily in use and those in reserve or idle; book value of land, buildings, plant and machinery (not capital invested); value of material, containers, repairs and replacements, power, fuel and light (including water and lubricating oil) used in factories; quantities and values of fuel used; value of output; value of production; and quantities and values of principal materials and articles of output.

Factory.—For the purposes of the statistics a "factory" is an establishment in which four or more persons are employed, or power (other than manual) is used, in any manufacturing process.

Average Number of Persons Employed.—

(A) *During Period of Operation* represents the aggregate of the average number of employees in each factory—the average being calculated for the period the factory was operating during the year.

(B) *During the Whole Year* represents the aggregate of the average number of employees in each factory—the average being calculated for the period of twelve months.

All persons employed in the manufacturing activities of a factory are counted as factory employees, including operatives, managerial and clerical staff at the factory, working proprietors and "out workers." Persons engaged in selling and distribution, such as salesmen, travellers and carters engaged solely on delivery of manufactured goods are not included.

Rated Horse Power of Engines Installed.—Statistics of power used in factories other than central electric generating stations relate to the "rated horse-power" of engines ordinarily in use and of engines in reserve or idle, omitting obsolete engines. In the case of central electric generating stations the figures refer to the "rated capacity" of engines and generators installed.

Value of Materials used includes the value, as at the factory, of the materials and stores used, containers, tools replaced, and materials used in repairs to plant. The following are exceptions :—

(*a*) Where factory operations consist of assembling manufactured parts of machines, motor cars, etc., the value of the parts is not included;

(*b*) Where goods in bulk, *e.g.*, tobacco, tea, are made up in packets the value of the bulk goods is not included;

(*c*) The value of customers' materials made up or treated is not included.

Value of Fuel, etc., Consumed.—This item includes not only coal, coke, oil, gas, wood, etc., but the cost of electric power and light used. For convenience the cost of lubricants and water used are also included under this heading.

Value of Output is the value of the goods manufactured or work done. It is based generally on the wholesale value at the factory, exclusive of cost of delivery and of excise duty (if any).

Value of Production is the value added to materials by the processes of manufacture. It is calculated by deducting from the value of output the value of materials and fuel used (as defined above).

[*Note.*—Materials, fuel, output and production are valued as at the factory.]

THE FORM AND INSTRUCTIONS.

A copy of the front of the Form issued to proprietors of factories is reprinted on the following page. Provision is made on the back of the form for the collection of particulars of materials used and articles produced.

A copy of the instructions issued for the guidance of those responsible for furnishing the information is also shown.

INSTRUCTIONS TO PERSONS FILLING IN FACTORY RETURNS.

General.

1. *These returns are collected under the authority of the " Census Act, 1901," and any person concerned who refuses or neglects to answer any of the questions on the return is liable to a penalty of £20. An extension of time will not be granted unless it can be shown that it is impracticable to supply the return within the time allowed.*

2. *Your returns will be regarded as strictly confidential. The information given in these forms is used only for statistical purposes to arrive at aggregate for each kind of industry in the State. The contents of individual returns are not disclosed in any way, and no other department, or officer unattached to this office, is permitted to see them.*

3. *Several Industries in One Establishment.*—In large establishments where two or more industries are carried on, separate forms will be supplied, which should, if practicable, be filled in for each industry. The particulars relating to the whole establishment should be allocated, as nearly as possible, to each industry.

4. The line " Nature of Work Done " should be used for a brief description of the main operations or processes carried out, *e.g.* Brickmaking, Shirtmaking, Motor Repairing, Bread Baking, Sawmilling, etc.

5. Where a manufacturing business is carried on in connection with a wholesale or retail trading business, the return must be restricted to the details of the *manufacturing branch only.* That portion of the premises used for manufacturing purposes should be separately valued and shown under Part C. *Particulars concerning Salesmen, Travellers, Collectors, and Retailing Storemen must NOT be included with persons employed in the factory, or in salaries and wages paid.*

Explanation of Items Required.

6. *Period Worked.*—The time the establishment was working during the year is to be given in calendar months, holidays during working period being also included.

7. *Average Number of Persons Employed.*—Part A.—This means the average for the period of operation. For example, for an establishment working the whole year the average will be the sum of the *total* employees for each week of the year divided by 52; the average for an establishment working three months will be the sum of the weekly totals divided by 13, and similarly with other periods. The total of the average numbers employed must be distributed under the various groups as shown.

Note.—*Carters* (on wages—not contractors) employed in bringing material for manufacture should be included, but not those engaged entirely *in the delivery of manufactured goods,* as the value of output of such goods is the wholesale selling value at works, and exclusive of all delivery costs or charges. If the carter's work be divided in this respect, however, he should be included.

8. *Salaries and Wages Paid.*—Part A :—

Working Proprietors.—Where a working proprietor is engaged wholly or partly in the manufacturing section of his business, either by way of superintending or actual work, such time has a salary or wage value which he may pay to himself either directly by weekly or other periodical " drawings," or else indirectly in the profits of the business. This is the value that is required to be shown, and *would probably be equal to what he would have to pay another person for the same services.*

Other Employees.—The total amounts of salaries or wages paid to all employees during the year are required to be given.

9. *Engines employed to Drive Machinery.*—Part B.—In furnishing particulars of the number and rated horse power of engines in their works, firms are required to show separately those ordinarily in use and those in reserve or idle during the year. These terms are intended, to cover respectively, engines in use for the greater part of the year, even though not working to their full capacity; and engines not in use, or only in use occasionally, as during periods of breakdown to machinery ordinarily in use. Care should be exercised to see that obsolete engines are omitted. If the same power is used in the one establishment for more than one " industry," the horse power of the engines should be allocated, if practicable as indicated in 3 above. In such circumstances, if the *number* of engines cannot be readily allocated on the same basis, show the number on the form relating to the " industry " which consumes the larger part of the power.

10. *Value of Land and Buildings used for Works and Factory Purposes.*—Part C.—Where the Land, Buildings and Fixtures are the property of the occupier, the values stated should be the depreciated values or book values less any depreciation reserve existing in respect of them. If the premises are rented, state the amount of rent paid, exclusive of rates and taxes.

11. *Value of Machinery and Plant.*—Part C.—This should include the value of all machinery, implements, and tools used; also plant for the conveyance of raw materials (such as trams, carts, horses, etc., and casks in the case of a brewery). In brickyards, potteries, and glassworks the value of the kiln should be included under this head, and not as a building. The values stated should be the depreciated values or book values less any depreciation reserve existing in respect of them. Where rent is paid for machinery the amount paid must be stated in Part C on the front of the form.

12. *Cost of Power, Fuel and Light Used.*—Part D.—Care should be exercised to see that the costs are not duplicated in any of the other items. Coal used in the manufacture of coke and gas should not be included here but shown as a raw material opposite Item (vi). Fuel used in Blast Furnaces and Smelting Furnaces should be similarly treated.

13. *Materials used, etc.*—Part D Item 12.—The value quoted should be the cost landed at the factory of the materials actually used during the year. This is not necessarily the same as the amount expended during the year for the purchase of materials.

Making-up or Treating Customers' Materials.—If the values of the materials are not known, include in Part D Item 12 the value (cost) of maker's own materials, such as trimmings, cottons, etc. (dyes, etc., in dyeing) used, and in Part E, Item 14 B, the amount charged to customers for making-up or treating their materials.

Repair Work of any Kind.—The value (cost) of all materials used in repairing should be included in Part D, Item 12 while the amount charged for making repairs should be shown in Part E, Item 14 B.

Assembling the Manufactured Parts of Machines, Motor-cars, etc.—Where manufacturing operations consist only or partly of assembling the manufactured parts of machines, motor-cars, etc., the value of the parts should not be included in the cost o materials used, nor in the value of output. The latter value should be shown in Part E, Item 14 B, and should include the actual labour cost of assembling the parts, cost of fuel and power used, any additional expenses of assembly, and profit made on such work.

Finished Goods Purchased for Re-sale.—The value of finished goods purchased for re-sale without treatment must not be included anywhere.

14. *Value of Output.*—Part E, Items A—B.—This refers only to goods actually made during the year, including by-products, and must not be confused with goods sold during the year, which in most cases include some goods made in the previous year. That portion of the goods manufactured and remaining unsold at the end of the year should be valued at current rates.

Goods in Process of Manufacture.—The value of goods in process of manufacture at the end of the year must also be included in the value of output. Care must be taken to see that the value of goods in process of manufacture at the beginning of the year is excluded.

Costs of Installation, etc.—Where the selling price of manufactured goods includes installing or fixing (shop and window fittings, tiles, fibrous plaster-sheets, etc.) the charges for transport, installation, erection or fixing of such goods must be deducted in valuing output in Part E, Item 14 A. Employees engaged in such work and their wages should also be excluded from Part A.

15. *Excise.*—Excise must not be included in the value of any article manufactured.

16. *Bounty.*—The amount received as bounty on the production of any article must be included in the value of goods manufactured (Part E).

Directions Relating to Special Industries.

17. *Newspapers, Magazines, and Journals.*—If the newspaper, magazine, or journal is printed by the proprietors, only the persons employed in the printing should be included in the return. The value of the output need not be stated, but all other particulars must be furnished. In other cases, where the newspaper or journal is printed for the proprietors by another person, it should be treated in the return of the printer as ordinary job printing.

18. *Food-packing, Tobacco-cutting and Packing, Tea-blending and Packing, Bottling and Grading Establishments.*—In these and other similar establishments where imported or other goods in bulk are made up in packets, but no actual manufacturing is done, only the value added to the material by the operation should be shown in Part E, Item 14 B. This value may be ascertained by subtracting the cost of materials used, wrappings, etc., from the wholesale selling value of the finished goods.

19. *Meat Works.*—Amounts paid to employees, temporary or permanent, in their capacity as train attendants, cattle buyers, or in any other way connected with bringing the stock to the factory, should not be included as salaries or wages in return. By valuing live stock at the cost landed at the factory (Part D) such costs are automatically included.

20. *Bakeries.*—Carters and all persons engaged solely in delivery and in selling the commodities produced should be excluded. The output value should be the selling value of bread, etc., made, less all delivery and selling costs.

21. *Cold Storage.*—The value of the commodities placed in the cold store should not be included in the cost of materials used (Part D) nor in the value of the output (Part E). The latter value should be shown in Part E, Item 14 B, and should include the actual labour cost, the cost of fuel and power used, any additional expenses of storing, and profit made on such work.

22. *Brick, Pottery and Tile Works.*—The value of materials used shown in Part D must include wages of pitmen and all other costs incidental to obtaining clay and delivering at the kiln. The value of the kiln must be included as part of your plant and not as a building.

23. *If any difficulty arises the Government Statistician will be pleased to furnish additional information, either by letter or telephone.*

NOTE—Materials in above table include fuel, and wages include salaries. The balance is in general the proportion which accrues to the proprietors for general purposes including depreciation, taxation, Workers' Compensation, &c., and profit, but in some cases, *e.g.* rubber, the total value represents only the value at which products are passed to the sales department.

No. 15.—Value of Factories, Machinery, Materials, Wages and Output, 1944–45.

Class of Industry.	Lands, Buildings and Fixtures. 1	Machinery, Implements Tools, and Conveyance Plant. 2	†Salaries and Wages Paid. 3	Materials Used. 4	Containers, etc. 5	Tools replaced repairs, etc. 6	Total 7 = 4 plus 5 and 6. 7	*Fuel Consumed. 8	Goods Manufactured or Work Done. 9	Value of Production 10 = 9 minus 7 and 8. 10

* Includes area sown for green food. In 1927-28 and previous years all areas fed-off were included in this column. In later years areas fed-off with value less than the value on the farm of five bushels of grain at current price were considered to have failed entirely. In such cases the acreage was allocated to grain or hay according to the purpose for which sown.

† Information not available. ‡ Flour has been expressed at its equivalent in wheat.

† Prices based on averages of heavy and medium weights.

NOTE.—The above prices for sheep represent the averages for all sheep, whether shorn or woolly; but as a general rule the fat sheep at market in January and February are shorn; during March and April they have growing fleece; from May to August they are woolly and in September to December they comprise both shorn and woolly. Relatively few crossbred wethers and ewes are marketed at Homebush.

Due to the mobility of beehives and the fact that colonies are maintained on holdings of less than 1 acre and on larger areas not otherwise used for agricultural and pastoral purposes (e.g. Crown Lands, Forest Reserves, etc.) the above statistics are not a complete record of apiaries in N.S.W. In 1942, 1943 and 1945 production was estimated on the basis of visible receipts of honey.

Section III.—METEOROLOGY.

The Tables in this Part have been compiled from particulars furnished by the Commonwealth Meteorologist.

No. 1.—Barometric Observations, Sydney, 1945.

Time Ball.—The Time Ball at the Sydney Observatory is dropped every day at 1 p.m. Standard Time. The Time Ball at Newcastle is controlled by signals from the Sydney Observatory.

Standard Time.—The mean time of the 150th meridian of longitude (or 10 hours) east of Greenwich, England, is the Standard Time throughout New South Wales, except for certain purposes in the Municipal District of Broken Hill and the Electorate of Sturt, for which the mean time of the 135th meridian of east longitude is adopted.

Position of Sydney Observatory.—Latitude, 33° 51′ 41·1″ south; longitude, 151° 12′ 23·10″ east; altitude, 138 feet.

Month.	Barometer Readings, corrected to 32° Fah. and Standard Gravity at Lat. 45°, but not to Mean Sea-level. Height above mean sea level:—138 feet.						Mean Height of Standard Barometer, corrected to 32° Fah. Gravity and Mean Sea-level.

NOTE.—The above tables are based upon the records of the Commonwealth Meteorologist. The divisions correspond approximately with the statistical divisions shown on the map in the frontispiece of the Official Year Book of New South Wales and listed in tables in other parts of this Volume. Where divisions in the above table are subdivided into two sections the letters N, S, E, or W indicate the northern, southern, eastern or western portion of the division concerned.

NOTE.—The above table shows the ratio of actual to normal rainfall each month, the normal rainfall being the average over a long period of years ended 1929

No. 14.—Meteorological Conditions, New South Wales, 1944.

Great deficiency of rainfall was the outstanding meteorological feature in New South Wales during 1944. In all divisions falls were below normal. Western and Southern areas were most adversely affected, and large sections received only about fifty per cent of normal rainfall. The drought was less severe in northern areas, where the North Coast and Northern Tablelands received more than 80 per cent of normal rains. During the year the rainfall in Sydney amounted to 31 inches, which is 16 inches below the annual average for eighty five years.

Temperatures.—Seasonal temperatures varied considerably throughout the year, but the annual means were close to normal. Winter months were colder than usual; spring weather was comparatively warm and dry.

January temperatures were generally above normal but were alleviated by several cool spells Statewide in extent. In February readings east of the Tablelands were about normal; in western areas temperatures were well below average. Day temperatures throughout March were normal, but night readings were higher than normal in all divisions except the Riverina. Mean temperatures in April were below normal in all divisions except the Northern Tableland and Hunter-Manning, where readings were slightly above normal. Both day and night temperatures in May were much below normal, due to a number of cold snaps during the first half of the month. June readings were below normal in all divisions with the exception of the North Coast. Very cold weather was experienced in July with severe and widespread frosts on Tablelands, Slopes and Plains. In Western areas, however, night and day temperatures were slightly above average. August temperatures were a little above normal for the most part, but northern areas were the only divisions where both day and night readings were higher than usual. In September temperatures throughout the State ranged from 14 degrees at Kosciusko to 95 degrees at Mungindi. Readings generally were higher than normal. October temperatures varied somewhat but, on the whole, were slightly above average. The excess was greatest in the North Western and Hunter-Manning districts. Highest readings of the year occurred in November and December. A number of heat waves were experienced, associated with northerly winds and dust storms which swept the entire State.

The highest temperature recorded was 118 degrees at Jerrys Plains on 19th November. Kiandra, with 4 degrees on 22nd June, registered the lowest reading of the year.

Wind.—The greatest velocity of wind measured at Sydney was 72 miles per hour on 24th April.

The following is a resume of the weather conditions experienced during each month of 1944 :—

January.—Rainfall in this month was very deficient in all areas except the northern portions of the State where local floodings occurred. Temperatures were generally above normal, with several very hot periods. Jerrys Plains with 113 degrees recorded the highest reading.

February.—Upper Western was the only area to receive rainfall in excess of average. The deficiency below normal varied from nine per cent. in Central Western Plains to ninety per cent. in the Riverina and South Western Slopes. Temperatures over a large area of the State were below normal. The highest temperature of the month was registered at Ivanhoe.

March.—Notwithstanding scattered heavy showers, rainfall in every division of the State was substantially below the average. Apart from night readings, temperatures were generally normal. Menindie, Balranald and White Cliffs recorded maximum readings of 104 degrees.

April.—In this month the rainfall in all divisions with the exception of the Riverina and Southern Tableland was below normal, particularly in northern and western sectors. Mild to warm conditions earlier were replaced by squally winds and rather low temperatures, with snow on the Southern Highlands. Temperatures ranged from a minimum of 17 degrees at Kiandra to a maximum of 99 degrees at Wentworth, Broken Hill and Berrigan.

May.—Splendid rains were received in all areas, except the North Coast and Upper Western; the South Coast and Southern Tablelands being particularly favoured. The cold weather and depressed readings of the first half changed to normal as the month advanced. A maximum temperature of 81 degrees was recorded at Casino.

June.—Rainfall was far below normal throughout the State. Only three divisions—North Coast, Hunter-Manning and Metropolitan—received half normal rainfall and ten divisions received only 20 per cent or less. Two very cold "snaps" were experienced in the latter part of the month and readings below 20 degrees were recorded in many centres. The highest reading was 76 degrees at Tibooburra. A minimum temperature of 4 degrees was recorded at Kiandra.

July.—Good rains fell in the northern part of the State and along the Coastal belt, but central and Southern areas recorded deficiencies. Very cold weather was experienced up to the fourth week of the month and unusually low temperatures were recorded on Tablelands, Slopes and Plains. The highest reading was 77 degrees at Bourke.

August.—Rainfall was above average over a considerable portion of the State. The most favoured divisions were the Coastal, Northern Tablelands, North Western Plains and North Western Slopes. Most of the Central Western Slopes and Plains and part of the Central Tablelands and Western Division also received good rains. In the southern section of the State, however, rainfall was below normal. Temperatures in Northern areas were slightly above the average. The maximum reading of 83 degrees was recorded at Tibooburra.

September.—During the first two weeks practically no rain of any consequence was received, and in all divisions the monthly total was below normal. Temperatures ranged from a minimum of 14 degrees at Kosciusko to a maximum of 95 degrees at Mungindi.

October.—This was another dry month. The Riverina received rainfall 16 per cent above average, but in every other division it was below average. In the Upper Western division only 7 per cent of normal rainfall was recorded. Temperatures were about normal, with a maximum reading of 105 degrees at Cobar.

November.—A survey of the average rainfall over the State disclosed that only 39 per cent of normal rainfall was recorded in November. Heavy falls were registered at scattered points in the Northern and Central Slopes, but in every division recordings were less than average. Temperatures were unusually high and were associated with hot winds and dust storms all over the State. Jerrys Plains experienced a maximum reading of 118 degrees.

December.—Unusually dry conditions continued throughout December, and rainfall was below normal in every section of the State. Central areas were particularly dry. Temperatures varied considerably. The maximum of 115 degrees was recorded at Cobar.

No. 15.—Monthly Rainfall, 1941 to 1944—Representative Stations in Divisions.

NOTE.—Particulars for earlier years are given in earlier issues of this publication. For monthly rainfalls at representative stations from the earliest date available in each case to 1906 see Statistical Register, 1924–25. The average annual rainfall, at a number of stations over a period of years is shown in table No. 17 of this issue.

NOTE (—) Denotes no record, and (...) no rainfall during the month.

PART III—FINANCE AND LOCAL GOVERNMENT.

Section I.—PUBLIC FINANCE.

No. 1.—State Revenue and Expenditure, 1935–36 to 1944–45.

The following table represents a combined statement of the revenue operations of the Governmental section of the State accounts, the chief business undertakings of the State, and the road vehicles registry and traffic control branch. It does not embrace all State activities but is sufficiently comprehensive to indicate the condition of State finances on revenue account. The most important omission is the Main Roads Department, accounts of which are summarised in Table 9.

The Governmental section consists of the Consolidated Revenue Fund, and, in the years ended June, 1939 to 1941, the Unemployment Relief and the Social Services Funds. These and the Road Transport and Traffic Fund are on a "cash" or "receipts and payments" basis, but the revenue and working expenses of the business undertakings are on an "income and expenditure" basis. The public debt charges relate only to activities included in the table; the total debt charges paid in respect of all State Government activities are shown in Table 20 (Interest and Exchange) and Table 22 (Sinking Fund).

A dissection of Governmental revenues and expenditures is shown in Tables 2 and 3, and of the Road Transport and Traffic Fund in Table 8. The accounts of business undertakings for 1944-45, showing the allocation of debt charges thereto, are briefly summarised in Table 11. Particulars of expenditure shown in the table have been revised to agree with the current form of State accounts.

* Includes Commonwealth reimbursements under uniform tax schemes. See Table 5.

No. 5.—State Taxation Collections, 1929–30 to 1944–45.

Uniform Taxation on Incomes has been levied since 1st July, 1942, on income derived 1941-42, and on *admissions to entertainments* from 1st October, 1942. Under the system, taxes at uniform rates throughout Australia are levied by the Commonwealth in place of the separate taxes formerly levied at various rates by both Commonwealth and States on income and by the States on admissions to entertainments. The States are reimbursed by the Commonwealth for suspension of the State taxes. Reimbursements payable annually to New South Wales are as follows: (a) Years 1942-43 to 1945-46, *Income Tax* £15,356,000 less arrears of State Income Tax collected; *Entertainments Tax*, £160,830 (£120,623 in 1942-43); (b) Years 1946-47 and 1947-48, £16,477,000 in respect of both taxes, less arrears of State Income Tax collected. Subsequently reimbursements are to be varied in accordance with changes in population and the level of wages.

Year ended 30th June.	Income Tax, Unemployment and Social Services Taxes.		Probate and Stamp Duties.	Entertainments, Racing, Betting.	Family Endowment.	Motor Taxes, Registrations, Licenses, etc. *	Other (Licenses and Land Tax). †	Total.

No. 7.—Tax on Incomes Derived by Individuals resident in New South Wales in 1945–46.

The incidence of Commonwealth tax on incomes of individuals derived in the year ended 30th June, 1946, is illustrated by the following examples. On incomes from 1st January, 1946, the tax is imposed as two levies; viz, Income Tax and Social Services Contribution, the combined rates being lower by approximately 12½ per cent. than the rates of Income Tax in force in the earlier half year. The amounts shown below have been calculated at the rates operative in the respective half years, including Social Services Contribution but excluding concessional rebates except for the dependants indicated.

No. 8.—Road and Traffic Funds, Receipts and Disbursements, 1938–39 to 1944–45.

Receipts by the State from the taxation and registration of road transport vehicles, licensing of drivers, etc., are paid into special funds for road and traffic purposes as shown below. Disbursements on specified services represent actual payments during each year; payments to road making authorities consist almost entirely of transfers to the Main Roads Funds of which particulars are shown in Table No. 9.

* The Road Transport and Traffic Fund is included in the aggregate statement of State Revenue and Expenditure shown in Table 1.

No. 9.—Main Roads Funds—Income and Expenditure, 1935–36 to 1944–45.

The accounts of the Department of Main Roads, as shown below, were compiled on an "Income and Expenditure" basis until 1940–41, and on a "Receipts and Payments" basis in 1941–42 and later. After the outbreak of war the department constructed extensive defence works (in New South Wales and elsewhere) for which the Commonwealth Government provided funds. Notwithstanding the change in accounting and extension of activities the following table has been compiled with a view to present comparable data as to principal sources of funds and expenditure on the Main Roads system of New South Wales.

† Face Value of Securities converted at rate of $4·8665 to £.
‡ Balance of funds at 30th June, 1945, amounted to £161,500.

In terms of the Financial Agreement, contributions are paid annually to the National Debt Sinking Fund in respect of New South Wales debt, as follow:—

1. For 58 years from 1st July, 1928, on net debt outstanding at 30th June, 1927—(*a*) 2s. 6d. per cent. by Commonwealth. (*b*) 5s. per cent. by State.
2. For 53 years on new loans raised after 30th June, 1927, (except for revenue deficits)—5s. per cent each by Commonwealth and State.

Upon agreement that a loan expended on wasting assets should be redeemed within a shorter period, the State's contribution is increased to provide for redemption within the period fixed, allowing for accumulation at 4½ per cent. compounded.

3. On loans raised to meet a revenue deficit accruing after 30th June, 1927—(*a*) Special deficit loans incurred in depression, 5s. per cent each by Commonwealth and State, until 30th June, 1944, thereafter for 39 years 5s. per cent. by Commonwealth and 15s. per cent by State.
(*b*) On other deficit loans, at least 4 per cent., payable by the State, to be accumulated at 4½ per cent. per annum, compounded.
4. Interest on cancelled securities at the rate of 4½ per cent.

Additional contributions are paid by the State to recoup amounts appropriated from the Sinking Fund for discounts on conversions since November, 1936. The additional contributions are spread over the currency of the conversion loans, and the first payment was made in 1938–39.

No. 23.—Loans Guaranteed by State, raised by Corporate and Other Bodies, 30th June, 1945.

In addition to liability for its own loans, the State has a contingent liability under guarantees for the repayment of capital raised by certain corporate authorities, institutions and bodies engaged generally in the promotion of public welfare and development.

No. 8.—Trading Banks—Deposits, Investments and Advances in Australia, Weekly Averages, 1945-46.

This table relates to the seventeen banks listed in Table 3. Three of the banks (Ballarat Banking Co., Brisbane Permanent Building and Banking Co., and State Bank of South Australia) operate in other States but not in New South Wales. The particulars are in a new form as prescribed by the Banking Act, 1945. The Commonwealth Bank (General Banking Division), was constituted by the Commonwealth Bank Act, 1945, and comparative figures for the Division are not available prior to September, 1945.

* Amounts of clearings shown are the recorded totals less Treasury Bill transactions.

† The index is based upon the amount of clearings as adjusted to eliminate the effects of bank amalgamations and Treasury Bills and other special transactions on account of governments. The index shown for each month is the average of ratios for that month and the two preceding months, obtained by relating the amount of clearings for each month to the average of the clearings for the corresponding month in the base period 1926-1930. This average is represented by 100 each month.

* Three-monthly moving average ended month shown. † August to December.

No. 30.—Yields on Commonwealth Government Securities in Australia, 1932 to 1946.

(Calculated by the Commonwealth Bank of Australia.)

On account of change in the method of calculation, yields shown for 1934 to 1941 in the first section of the table are not strictly comparable with those for 1941 and later years, shown in the second section. The details shown, however, indicate the general trend of yields at the time of change.

Interest on the securities is subject to Commonwealth Income Tax, but, for purposes of income taxation, the securities are classifiable into two groups, viz.

1. *Limited Tax Liability:* Securities in this group were issued prior to January, 1940, and the rates of tax leviable on income therefrom may not exceed the rates in force in 1930.
2. *Current Tax Liability:* These securities were issued since January, 1940, to which the limitation of tax specified in (1) does not apply. Income from these is subject to tax at current rates, as levied on each year's income. Yields are shown for the first tax group only to December, 1941, and for both tax groups separately from March, 1941.

No. 31.—Stock Exchange Index (Sydney) 1930 to 1946.

This index embraces the ordinary shares of the principal companies (excluding banking companies) on the Sydney Stock Exchange whose business is conducted wholly or largely in New South Wales. The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £ of paid-up capital. The aggregate index is the average of all shares included in the groups with the addition of 24 miscellaneous shares. There is no base period as the index represents the ratio per cent. of average prices of ordinary shares to their par values, adjustment being made where capital is written off or bonus shares issued.

Average for Period.	23 Manufacturing and Distributing Companies.	10 Retail Companies.	8 Public Utility Companies.	5 Pastoral and Finance Companies.	5 Insurance Companies.	Total: 75 Companies.	34 Active Shares included in foregoing.

Section III.—LOCAL GOVERNMENT.

No. 1—Municipalities—Valuations and Rates, 1944.

NOTE—In this table the *Unimproved Capital Value* is the amount which the fee-simple of the land might be expected to realise if offered for sale on such reasonable conditions as a *bona-fide* seller would require, assuming the improvements thereon had not been made.

The *Improved Capital Value* is the amount which the fee-simple of the land, with improvements and buildings thereon, might be expected to realise.

The *Assessed Annual Value* is nine-tenths of the fair average rental of land with improvements thereon.

* On 6th July, 1944, the area formerly comprised by the Municipalities of Maitland East, Maitland West and Morpeth and the Shires of Bolwarra, Kearsley and Tarro was rearranged to form three local areas, viz., the Municipality of Maitland and the Shires of Lower Hunter and Kearsley.

† Particulars of rates in 1942, latest available.

No. 2.—Shires—Valuations and Rates, 1944.

NOTE.—In this table the *Unimproved Capital Value* is the amount which the fee-simple of the land might be expected to realise if offered for sale on such reasonable conditions as a *bona-fide* seller would require, assuming the actual improvements thereon had not been made.

The Improved Capital Value and Assessed Annual Value are determined in only a few Shires.

Notes.

1. Since the beginning of 1927, the basis of tabulation for births and deaths for any subdivision of the State has been according to usual residence; consequently in this issue, comparison of these figures for any municipality, shire or division cannot be made with those for years prior to 1927. Marriages have always been tabulated according to the place of celebration.

2. There have been several changes in the delimitation of the Metropolis. The following successive additions of local government areas have been made:—
   - (*a*) From the date of the 1911 Census—
     Shire of Ku-ring-gai (incorporated as a municipality in 1927).
   - (*b*) From 1st January, 1929—
     Municipalities of Auburn, Bankstown, Granville, Lidcombe, and Parramatta.
   - (*c*) From 1st January, 1933—
     Municipalities of Dundas, Ermington and Rydalmere, and Holroyd (Pitt and Merrylands Wards only).

3. Commencing with 1933, full-blood aboriginals have been excluded from all figures. They have also been excluded from statistics of population for earlier years in certain of the tables, and where this has been done, an appropriate note has been inserted under the heading of the table.

4. For purposes of record, stillbirths are registered as deaths as well as births, but in the tables in this Part stillbirths are not included in the deaths.

5. (*a*) The death statistics herein recorded do not, except where otherwise stated, include defence personnel enlisted in New South Wales who died outside the State.

   Total defence force deaths are not precisely known, but the numbers so far recorded are as follows:—

Year.	Males.	Females.	Year.	Males.	Females.
1939	...	...	1942	1,801	2
1940	259	...	1943	2,164	16
1941	978	3	1944	2,178	14

   These figures are subject to revision. They do not include dead who are posted as "missing" or "prisoner of war."

   (*b*) Up to 31st December, 1941, the death figures include Australian defence personnel (irrespective of the State of enlistment) who died in New South Wales. These number 256 males and are included in the total defence force deaths shown above. From 1st January, 1942, all death figures, except where otherwise stated, relate to civilians only.

   (*c*) An adjustment of 981 males and 3 females, representing the accumulated difference up to the end of 1941 between the figures in (*a*) and (*b*) above, was incorporated in the estimate of population as at 31st March, 1942. This adjustment must be allowed for in considering the increase in population.

   (*d*) Allied defence personnel have been excluded from statistics of population and deaths.

‡ The compulsory registration of stillbirths became operative on the 1st April, 1935. Since that date all cases of plural births with stillborn children have been recorded whereas prior to that date only a small number were voluntarily notified.

No. 44—Single Stillbirths, 1944—Ages of Parents.

Ages of Parents in cases of Plural Stillbirths are shown in Table No. 45.

No. 18.—Coal Raised per Man-day, 1936 to 1945.

"Coal raised per man-day" may be calculated on a number of alternative bases depending upon the facts which it is desired to elucidate.

The following estimates represent the only basis possible with statistics at present available. They are derived by multiplying the average annual number of employees in each mine (other than open cuts) by the number of days worked by the mine during the year and dividing the aggregate "man-days" so obtained into the total output for all mines (excluding open cuts).

The resultant figures of "Coal raised per Man-day" are approximations and must be read and defined consistently with the basis of calculation. The total "man-days" used as a divisor includes absences of individual employees on days on which the mine is working, consequently the estimate of "Coal raised per Man-day" reflects, among other things, variations in the incidence of absenteeism.

Over the period shown the figures are comparable from year to year on the basis adopted. They should not be compared with figures of similar import for other countries without assurance that the bases adopted are comparable.

PART VI.—TRADE, TRANSPORT AND COMMUNICATION.

Section I.—COMMERCE.

Statistics of the Oversea Trade of New South Wales, which were omitted from the Statistical Registers, 1939–40 to 1943–44, owing to war conditions, are published in abridged form in this issue.

Statistics of oversea imports and exports are compiled by the Commonwealth Bureau of Census and Statistics from records of the Department of Trade and Customs. Lend-Lease imports and exports for the Forces in the Pacific Area are included, but supplies imported or exported direct to their nationals by visiting Allied Forces are excluded.

Customs entries for lend-lease goods were frequently delayed for some months and in such cases the imports were recorded in the month in which entry was passed.

Records are not available regarding some lend-lease imports and exports of war materials on Government account for which entries were not passed in the normal way. The Commonwealth Statistician has estimated that the value of this unrecorded trade of Australia (all States) was as follows :—

Imports £stg.16,094,000 in 1941–42, nil in later years. Exports (non-foodstuffs) £A12,645,000 in 1941–42, £A2,500,000 in 1942–43, £A10,000,000 in 1943–44 and £A2,000,000 in 1944–45. These amounts cannot be apportioned among the various States and no estimate of the amount of New South Wales trade unrecorded is included in the statistics published herein.

No. 14.—Imports Oversea into New South Wales—Years ended 30th June, 1939 to 1945.

Statistics of Imports.—See notes above Table No. 1.

Value of Imports.—The value of goods imported from countries beyond Australia is recorded in British currency and represents the amount on which duty is payable or would be payable if the duty were *ad valorem.*—Section 154 (1) of the Customs Act, 1901–1936, provides that " when any duty is imposed according to value, the value for duty shall be the sum of the following :—

(*a*) (i) the actual money price paid or to be paid for the goods by the Australian importer plus any special deduction; or
(ii) the current domestic value of the goods, whichever is the higher;
(*b*) all charges payable or ordinarily payable for placing the goods free on board at the port of export; and
(*c*) ten per centum of the amounts specified under paragraphs (*a*) and (*b*) of this sub-section."

" Current domestic value " is defined as " the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of these goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country."

Quantities.—Generally, but not invariably, quantities have been shown in the ordinary trade unit. Where imports have been declared in packages without an indication of the number, capacity, or weight of the articles imported, the values only have been inserted.

N.E.I. means " Not elsewhere included."

No. 15.—EXPORTS OVERSEA FROM NEW SOUTH WALES.

Years ended 30th June, 1939 to 1945.

Statistics of Exports.—See notes above Table No. 1.

Value of Exports.—The value of goods exported is recorded in Australian currency, and includes the cost of containers. Until 30th June, 1937, the commodities were assessed at their value in the principal markets of the Commonwealth, except the following commodities, concerning which an alteration in the method of valuation of exports was made as follows:—

From 1st July, 1929, to 30th June, 1937.—*Sugar* (*a*) sold in Australia for export: The value f.o.b., at which the sugar was sold to oversea buyers; (*b*) shipped on consignment: The f.o.b. equivalent of the ruling price of such sugar in the London markets.

Goods on which bounty or rebate is payable on export.—The value in the principal markets of the Commonwealth less the amount of any bounty or rebate.

From 1st July, 1930, to 30th June, 1937.—*Wool* (*a*) sold in Australia for export: The actual price paid for the wool plus the cost of all services incurred in placing the wool on board ship; (*b*) shipped on consignment: The f.o.b. equivalent of ruling Australian prices.

From 1st July, 1932, to 30th June, 1937.—*Wheat* (*a*) sold in Australia for export: The f.o.b. equivalent of the price at which the wheat was sold; (*b*) shipped on consignment: The f.o.b. equivalent of the current selling price overseas.

From 1st April, 1934, to 30th June, 1937.—*Butter* (*a*) sold in Australia for export: The f.o.b. equivalent of the price at which the butter was sold; (*b*) shipped on consignment: The f.o.b. equivalent of the current ruling price overseas.

From 1st July, 1934, to 30th June, 1937.—*Flour* (*a*) sold in Australia for export: The f.o.b. equivalent of the price at which the flour was sold; (*b*) shipped on consignment: The f.o.b. equivalent of ruling Australian prices.

From 1st July, 1937, the following values have been adopted for exports generally: (*a*) Goods sold to oversea buyers before export: The f.o.b. equivalent of the price at which the goods were sold, *e.g.*, as regards wool, the actual price paid by the oversea buyer plus the cost of all services incurred by him in placing the wool on board ship; (*b*) Goods shipped on consignment: The Australian f.o.b. equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were dispatched for sale. As regards wool, the f.o.b. equivalent of current price ruling in Australia will normally provide a sufficient approximation to the f.o.b. equivalent of the price ultimately received.

Quantities.—Generally, though not invariably, quantities have been shown in the ordinary trade unit. Where exports are declared in packages, without an indication of the number, capacity, or weight of the articles exported, only the values are inserted.

N.E.I.—Means "Not elsewhere included."

Ships' Stores.—Goods shipped as ships' stores on board oversea ships have not been included in exports. For ships' stores, see Table No. 16, page 438.

Section II.—SHIPPING.

The Shipping Statistics of New South Wales contained in Tables Nos. 1 to 32 relate generally to vessels engaged in normal trade, that is, the carriage of part or full cargoes for civil purposes. They are exclusive of war vessels, cable laying vessels, yachts and vessels engaged in intrastate trade only, and during the war period vessels engaged exclusively in the transport of troops, war equipment and supplies. Vessels are entered at the first port of call in New South Wales and cleared at the port from which final departure is taken. The repeated voyages of vessels are included and net tonnage is shown. In Table No. 33 particulars are shown regarding all vessels (excluding warships) which entered the principal ports of New South Wales, viz.: oversea, interstate and intrastate vessels, including vessels engaged exclusively in the transport of troops, war equipment and supplies. This issue contains statistics for the years ended 30th June, 1940 to 1944, which for security reasons were omitted from the Statistical Registers for those years.

No. 44.—Harbour and Wharfage Rates at 30th June, 1945.

Harbour and Wharfage Rates in the ports of New South Wales are collected by the Maritime Services Board. Inward rates are payable in respect of goods brought by sea for landing, and outward rates on goods shipped on a vessel. Special inward rates are prescribed for certain articles produced and shipped within the Commonwealth, and the inward rates for other goods are those shown under the heading of General Rates. At ports other than Sydney separate schedules of rates apply to coastwise goods. In Sydney Harbour outward rates are not levied on any consignment under 5 cwt. or 10 cubic feet. Goods transhipped are subject to transhipment rates, and not to inward or outward harbour or wharfage rates. Passengers' luggage is exempt.

STORAGE CHARGES—Port of Sydney.—If goods remain on unleased wharves or in the shed erected thereon, longer than six days after the final discharge of a vessel from overseas or longer than three days in the case of other vessels, wharf storage charges are levied against the owner of the goods, the rate per ton per day being 4d. for the first week, 5d. for the second week, 6d. for the third week, and 7d. thereafter. If goods remain on unleased wharves longer than two days after being received for shipment, the wharf storage charge is 1d. per ton per day. For the purpose of calculating this charge, 630 super feet of softwood timber or 384 super feet of hardwood timber is taken to equal 1 ton. The charges for storing timber at certain wharves, after two days, are at the rate per day of 1d. per ton during the first four days, thereafter 3d. per day.

(*a*) The outward and transhipment rates payable on primary and secondary products exported as cargo overseas are 20 per cent less than specified in this section. (*b*) The rate payable on coal shipped by oversea vessels for use as bunkers is 20 per cent less than the rate specified.

Religious Instruction.—Under the Public Instruction Act of 1880 it is provided that the teaching in public schools must be strictly non-sectarian. Secular instruction imparted by teachers is defined as including "general religious teaching as distinguished from dogmatical or polemical theology." Religious instruction may be given by authorised teachers of any religious persuasion to children of their religion for a maximum period of an hour each school day, children of different persuasions to be instructed on different days. The total number of visits paid by authorised teachers to State schools during 1944 was 170,207, namely:—Church of England, 68,059; Roman Catholic, 23,891; Presbyterian, 26,295; Methodist, 31,558; other denominations, 20,404.

* Conducted by the State. There were two colleges in 1944, one at Sydney and the other at Armidale.

The Teachers' College, Sydney, provides various courses to prepare students for teaching in rural, primary, kindergarten, home science, and secondary schools. Courses range from two to four years, or five years in certain cases leading to graduation in Arts or Science. In addition to academic work at the College, students are given practical work in demonstration schools and at selected supplementary practice schools. The number of volumes in the College Library is 57,684.

The Teachers' College at Armidale was established in February, 1928, with the object of training country students. The courses are similar to those at the Sydney College. The number of volumes in the College library is 13,894.

NOTE.—*Private Schools.* Any school, other than a State school, attended by children of statutory school age must be certified by the Minister for Education as efficient (taking into account the standard of instruction, qualifications of the teachers, suitability of school premises and general conduct of the school). Private secondary schools must be registered for the education of pupils holding State bursaries under the Bursary Endowment Act.

Statistics of business schools, ecclesiastical seminaries and uncertified nursery and kindergarten schools are not included in statistics of private schools.

Certified schools at private institutions (shown in separate statement in former issues) are included in Tables 19 to 23, 25 and 26.

WAGES.

No. 15.—Living or Basic Wages—1927 to 1946.

The wage-regulating tribunals exercising jurisdiction under State or Federal law base their determinations upon "living" or "basic" wages which represent the minimum rates which may be prescribed for adult unskilled workers.

Living Wage—State Awards and Agreements.—The determination of living wages for men and women was a function of the Industrial Commission of New South Wales from 1926 to 1937. The determinations applied generally to all industries within the jurisdiction of the Commission. In October, 1937, the basic wages of the Commonwealth Court of Conciliation and Arbitration were adopted for the purposes of awards and agreements under State system. The basic wage for women is usually proportionate to the rate for men, viz., 54 per cent. calculated to the nearest 6d.

Basic Wages—Commonwealth Awards and Agreements.—In the Commonwealth jurisdiction the basic wages, method and dates of adjustments are determined for each award or agreement with regard to the circumstances of the industry, the districts to which the award applies, etc. The basic rates shown below are fairly representative of those prescribed by the majority of the Commonwealth awards and agreements which provide for quarterly adjustment of wages according to the index numbers of retail prices in Sydney, New South Wales. In June, 1937, the Commonwealth Court added a fixed loading to the basic wages. Consequently, the basic wages now consist of a "needs basic wage" which is adjustable at intervals specified in the award or agreement, and a loading (5s. or 6s. per week in New South Wales) which remains unchanged. The "needs basic wage" was increased by 7s. a week by interim judgment, December, 1946.

BASIC WAGES PER WEEK—STATE AND COMMONWEALTH AWARDS AND AGREEMENTS—FROM OCTOBER, 1937.

The basic wages (men) for the districts of Sydney, Newcastle and Port Kembla-Wollongong are adjusted according to the retail price index numbers for Sydney, and the rates for the County of Yancowinna according to the retail price index numbers for Broken Hill. The rate for other localities is 3s. less than the Sydney rate. The fixed loading is 6s. per week for men. The rate for Crown employees in all districts is adjusted according to the weighted average index numbers for the five towns (Sydney, Newcastle, Broken Hill, Goulburn, and Bathurst) and the fixed loading is 5s. per week for men. (See note "Basic Wages" above).

No. 16.—Rates of Wages in Various Industries at 31st December, 1945.

The Rates of Wages, shown in the following table, are the minima prescribed by awards of industrial tribunals or by registered agreements, in terms of the industrial arbitration laws of the State of New South Wales or of the Commonwealth of Australia. "War loading" or other special allowance has been awarded for some occupations affected by special circumstances arising from the war; these are included in the rates quoted. For a few occupations, for which wages are not prescribed by award or agreement, average ruling rates have been stated. The rates relate to the metropolitan district except in the following cases:—Mining, shipping, agricultural and pastoral industries, and certain works in country districts for which special awards have been made, viz.: cement works at Portland and the iron and steel works at Port Kembla and Newcastle.

Living Wage and Child Endowment.—The wages prescribed by awards and agreements are based on a "living" or "basic" rate of which details are shown in Table No. 15. Payments in respect of child endowment are not included in the rates stated. See page 521.

Hours of Work.—In industries within the scope of the State Industrial Arbitration laws the hours are prescribed by the Industrial Commission of New South Wales. In the Commonwealth jurisdiction, the hours are prescribed by awards and agreements. The general standard was 44 hours per week in 1945.
